

ELECTRICAL SITE ENGINEER – FFR PROJECTS

METKA EGN, a utility-scale world class EPC, is seeking **an electrical site engineer** to join its construction team. The successful candidate will work closely under the project management team to manage the on-site operations during the construction period to ensure on schedule completion and compliance with the company's high-quality standards.

RESPONSIBILITIES

- Pre-condition site surveys
- Initial site setup and establishment (supported by the Site Manager)
- Identification of local resources, materials, services
- Assist the Site Manager with establishment and ongoing management of welfare and waste facilities, as well as plant hire (as required)
- Ongoing management of the on-site operations
- Ensure correct implementation of electrical, civil and mechanical construction drawings by the main Subcontractor
- Supervise subcontractors schedule and works
- Report to the Project Manager any deviations from the PoW or scope by the subcontractors
- Quantity and quality receipt of on-site materials from main equipment and local suppliers
- Manage construction flow and timetable
- Provide technical support and guidance, solving on site problems
- Preparation of daily, weekly, monthly progress reports and documentation for internal use and Client requirements
- Ensure compliance with QH&SE procedures
- Management of site finishing works and demobilisation

QUALIFICATIONS REQUIRED

- Bachelor's degree in electrical engineering. MSc in electrical engineering is considered an advantage
- Ability to interpret electrical, mechanical and civil construction drawings is essential.
- Knowledge of AUTOCAD is considered an advantage.
- Proven track record (**minimum 1-2 years' experience**) in the construction of energy related projects such as FFR projects and solar parks. Experience in FFR projects is considered an advantage
- Greek national or bilingual proficiency level of Greek language, both spoken and written
- Fluency in English essential
- Excellent organisational, communication and interpersonal skills

LOCATION

- United Kingdom

SALARY

- Good remuneration package
- Full time / contract
